

PPK Kit Mavic2 v1.0

Convert DJI to Mavic 2 Pro and Zoom PPK.
Easy integration without the need to open or edit the drone.

Description:

PPK-Kit-Mavic2 is an adapter system for connecting Emlid Reach M2 GNSS to a DJI Mavic 2 drone without having to disassemble or modify the drone.

Receiver (not included) for DJI Mavic 2 Pro and Zoom drone.

Key benefits:

- Works with Reach M2 module (not included)
- No need to open or edit a drone
- The kit attaches and disengages in seconds
- Does not require batteries (uses Mavic 2 battery)
- Very fast image release sensor
- Lightweight microelectronics: 70 grams.

An external sensor mounted on the drone detects a trigger for each photo and saves the timestamp to the log file of the Reach M module. Timestamps have been picked module after the flight and added to the images taken during the flight to the nearest centimeter

(geotags) type metadata using a variety of special software options on the market.

The Emlid Reach M2 module (not included) has multi-band precision centimeter GNSS system for UAV mapping up to 100 kilometers.
